Covelum™ Designer Whites dates back to incandescent halogen festoon days and has been upgraded as each new technology presents itself as mature and highly reliable. In 2017, Tivoli upgraded the PCB and added a whole range of color temperatures with Nichia LEDs. Covelum™ Designer Whites is a low voltage flexible festoon system that is designed for indirect interior applications. Covelum™ Designer Whites can do what LED tape light can't do by bending 90° to fit concave and convex curves on its "X" and "Y" axis.

Features

- Low Voltage (12V DC)
- Nichia LEDs
- 270 to 460 Lumens/ft. based on spacing of modules
- Adjustable festoon lamps
- Bendable 90° on the X and Y axis
- Fits concave and convex curves without special hardware
- Six (6) color temperatures available from 2200K to 4000K
- Max runs up to 46' with Class 1 and 23' with Class 2 power supplies
- Optional aluminum mounting channel available
- Use mounting clips for curved or arched applications

Mounting

Use optional aluminum mounting channel for linear mounting or use mounting clamps (2 per foot) for curved or arched applications.

Applications

- Ideal for both low and high ambient light interior applications coves and niches.
- Use for indoor applications

Warranty

5 years
