12V | Softstep II™ Titanium Plus +

TIVOLI
CAT:

FEET:

TYPE:

PROJECT:

A patented, ADA compliant, co-extruded bullnose step light with contrasting stripe or 100 % black (consult factory) and single or double row of LEDs.

Feature
- Softstep II Titanium Plus + Light Step is an illuminated, pliable bullnose designed for secure foot placement 3' - 12' lengths with a reflective edge for delineation and patrons' safety.
- An LED top and bottom row is recommended for 90° indoor steps more than 4' in length.
- Pre-cut and assembled according to specification.
- Optional illuminated row indicator is available (see Page 2).
- Matching field-cuttable wireway with contrasting grey stripe is available in 8' lengths.
- Soft-molded end caps complete the integrated system. Individually replaceable LED PCBs easily snap into Titanium modules for easy and economical maintenance.

Mounting
Easy glue and screw down installation with recommended construction adhesives.
Applications
Required for 90° indoor steps.

Available in custom lengths up to 12 feet.

Warranty
5 years

Optional Row Indicator Information

*For ordering details see sample organizing chart below.

Figure (A) Example figure shows Row Indicators on middle staircase, steps 10, 13, and 16.
Character Designation

When selecting Row Indicators for your SoftStep II™ Titanium Plus + installation, here are some examples and guides to make your ordering process easier.

Within the figure (A) illustration we have offered an example spreadsheet to help organize your needs when designing row indicators into your venue. Your spreadsheet should reflect the call out and placement of each step by row and it's number that requires an indicator as shown in figure (A).

When looking at a seating layout from the stage or screen perspective, usually the first chair on the left side of the first row would be A1. In our illustration we have an orchestra pit section, so our Row A and seat 1 to 11 start on the isle. Seats A11 and A12 are separated by the middle staircase and reflect that design in the Row Indicators as shown.

With every venue, each auditorium has it own unique design parameters. To assist you, the SoftStep II™ Titanium Plus + row indicators offer THREE CHARACTER placements of any letter or number combination you desire. Defining those character call outs is as easy as listing them in a spreadsheet as shown in figure (B).

To help organize and clarify your need for row indicators, it is important to create a spread sheet that reflects the placement of row indicators in your working drawings or blueprints. Our figure (A) example shows the placement of row indicators on steps 10, 13 and 16 in the middle staircase.
